## About Us

In 1963, **Accurate Engineering Company Pvt. Ltd.**, was established to design and deliver measuring instruments of best quality. As a part of a Corporate Group, **Aditya Engineering Company**, we are effectively sufficing to the requirements of clients pertaining to **Snap Gauge, Slip Gauge Blocks, Caliper Checker, Measuring Pin Set, Adjustable Snap Gauge, Tool Presetting Machine** and more. Throughout the years, we have strengthened our position as a manufacturer and supplier by focusing on product innovation, quality and development. This has helped us achieve technological excellence and become a pioneer in the field of metrology. We have a sophisticated infrastructure which is staffed with talented software developers and engineers. They work in sync with each other to ensure our clients requirements are fulfilled within the stipulated time frame.

## Quality Policy

We seek to attain total customer satisfaction by offering measuring instruments of optimum quality. To achieve this, we follow a stringent quality management system throughout all the stages of the production and design process. Every individual working with us adheres to it and helps us deliver quality proven products and value added solutions. Also, we have received certifications from NABL and CRISIL.

## Vision

To become a globally acknowledged company for designing and developing competitively priced and precision engineered range of Scale and Tape Measuring Unit, Adjustable Snap Gauge etc.

## Quality Assurance

Ever since the initiation, we attentively maintain the highest standards of quality of our entire product range and services. Our comprehensive array of products is manufactured by using the best grade of raw materials, which are sourced from our most trusted market vendors. The superiority of raw materials ensures the proper and exact fabrication and delivery of flawless products. Moreover, to assure our high market credibility, we test and check these raw materials as per industrial quality parameters. Further, the entire production process takes place under the extreme supervision of our quality controllers, who stringently scrutinize the thorough processing. Thus, our strict adherence to quality parameters ensures development of a qualitative product range.

# Our Products

**Caliper Checker**

**Inside Microchecker**

**Upgradation Gear Tester**

**Span Snap Gauge**

**Gear Shaft Measuring Machine**

**3 Wire Measuring Set**

**Dial Snap Gauge**

**Adjustable Snap Gauge**

**Measuring Pin Set**

**Scale And Tape Measuring  
Unit Line Measure 1000**

**Micro Vision Measuring  
System**

**Cast Iron UD Unit**

**Tool Presetting Machine**

**Dial Calibration Tester**

**Slip Blocks**

**Floating Carriage Micrometer**

**Universal Length Measuring  
Machine**

**Precirond 2000 Roundness  
Measuring Machine**
